Pregatirea setului de laparotomie Matodrape

1

Deschideti ambalajul exterior si asezati setul pe masa de instrumente. Folositi campul exterior pentru a proteja masa de instrumente si asezati elementele din set peste.

2

Acoperiti masa Mayo cu husa speciala.

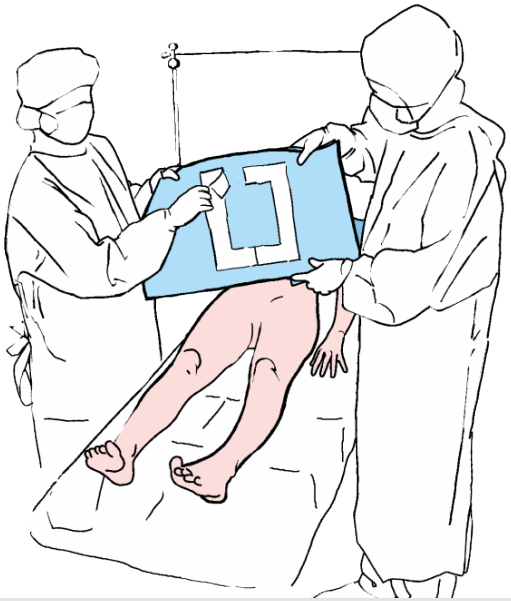

3

Inainte de a acoperi pacientul (delimitand campul operator), acordati atentie pictogramelor care indica directia in care se va desface campul.

4

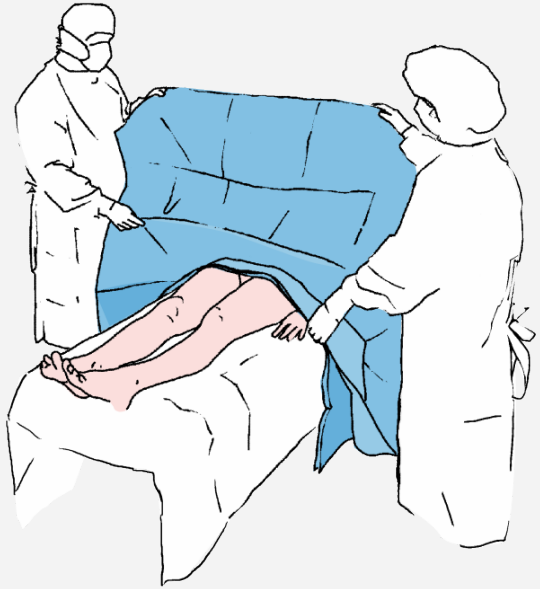

Indepartati hartia de protectie de pe campul principal si se lipiti pe corpul pacientului pentru a delimita marginile campului operator, apoi apasati usor zona aderenta pentru a se fixa pe pielea pacientului.

5

Desfaceti partile laterale ale campului astfel incat acestea sa atarne liber de pe masa de operatie .

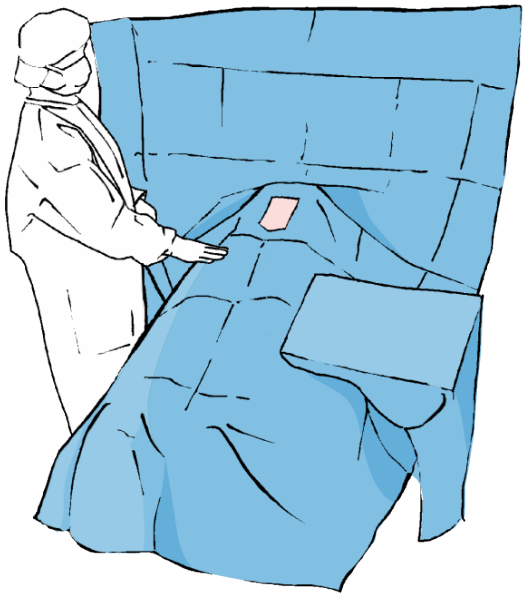

6

Desfaceti partea superioara a campului peste capul pacientului, spre monitorul de anestezie, trecand campul peste el si formand astfel un paravan.

7

Desfaceti partea inferioara a campului spre capatul inferior al mesei de operatie, peste picioarele pacientului.
