Pregatirea setului de toracotomie Matodrape

1

Deschideti ambalajul exterior si asezati setul pe masa de instrumente. Folositi campul exterior pentru a proteja masa de instrumente si asezati elementele din set peste.

2

Acoperiti masa Mayo cu husa speciala.

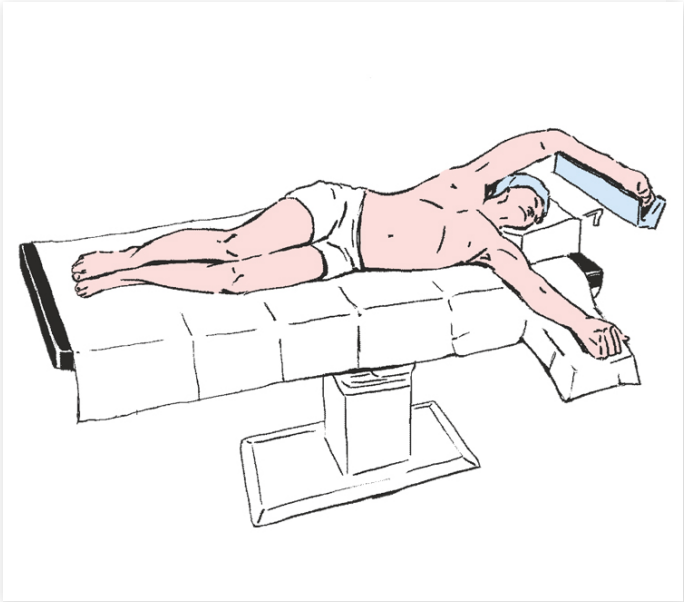

3

Inainte de a acoperi pacientul (delimitand campul operator), acordati atentie pictogramelor care indica directia in care se va desface campul.

5

Asezati campul cu decupajul "U" pe corpul pacientului.

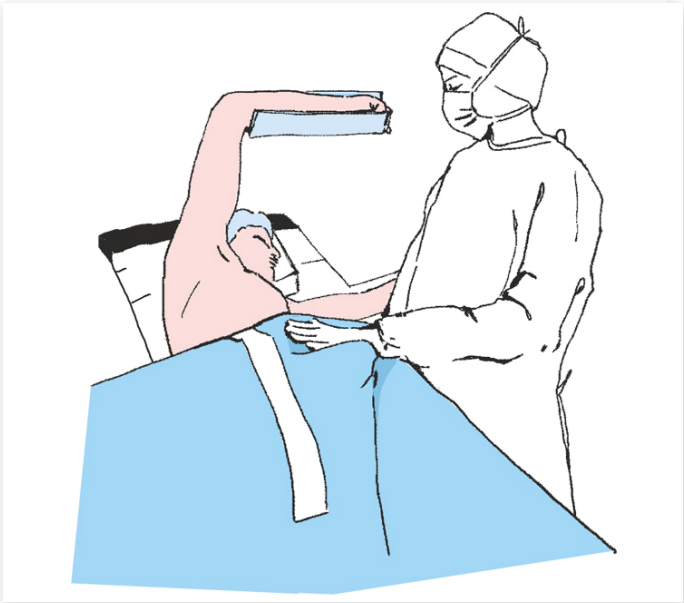

6

Partea inferioara a campului se desface in asa fel incat sa acopere picioarele pacientului.

7

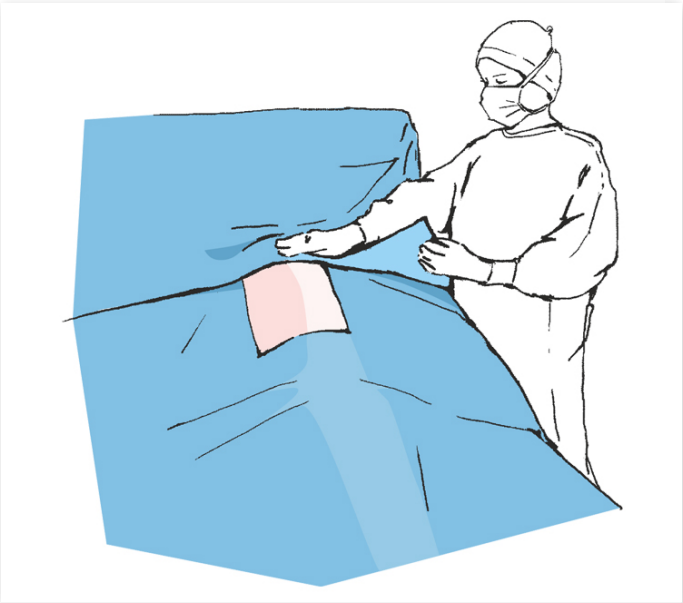

Indepartati hartia de protectie de pe partea scurta a benzii adezive si lipiti-o in partea inferioara a pieptului pacientului.

8

Indepartati hartia de protectie ramasa si lipiti banda adeziva cu atentie, spre capul pacientului, delimitand astfel campul operator. Presati in zona cu adeziv pentru o fixare mai buna pe pielea pacientului.

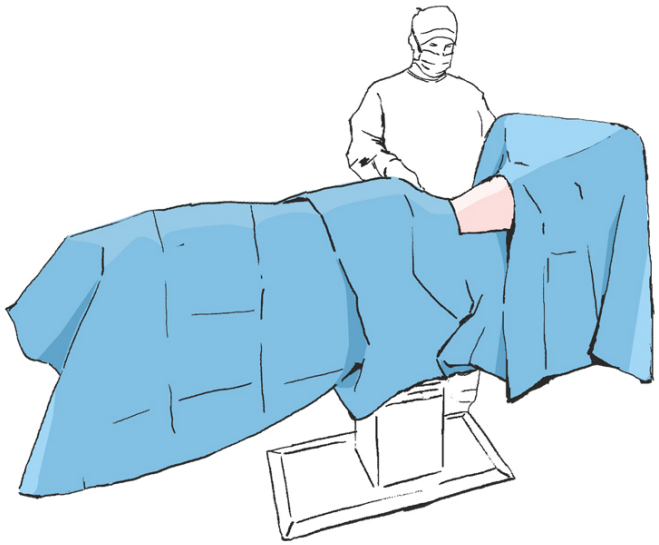

9

Indepartati hartia de protectie de pe campul superior si lipiti in partea de sus a pieptului. Presati in zona cu adeziv pentru o fixare mai buna pe pielea pacientului. Desfaceti campul in directia sagetilor, trecand peste monitorul de anestezie si formand un paravan.
